About Me

My path into design wasn't linear. I started with Computer Science, then moved into Psychology, and eventually found my way to UX/UI Design. Each step gave me a different lens to look at problems, and I've learned to bring all of them together.

I approach work curious by learning the interviews, observations, data. Only after understanding the real problem do I start designing. I'm not interested in making things look pretty for the sake of it. I want to create solutions that are clear, usable, and actually solve problems.

I'm always looking for challenges that push me to grow, whether that means working on complex systems, collaborating with cross-functional teams, or learning something entirely new. I'm also a big believer in sharing knowledge and helping others, which is why I've been mentoring junior designers at Accademia Italiana and Talent Garden. Designing and developing is not a place I have stopped to stay.

How I Work

I believe good design is evidence-based. My process follows a research-first approach:

- **Discover:** Understand the problem, the users, and the context.
- **Define:** Synthesize insights into clear problem statements and opportunities.
- **Design:** Explore solutions, iterate, and test with real users.
- **Deliver:** Collaborate closely with developers to ensure quality implementation.

Skills & Areas of Expertise

UX Design
- Design Systems & Tokens Design
- User Flows
- Wireframing
- Prototyping
- Usability Testing
- Interaction Design
- Accessibility
- Responsive Design
- Figma

UX Research
- Qualitative Research
- Quantitative Research
- Interviews
- Surveys
- Analytics
- Competitive Analysis
- Heuristic Evaluation

UX Design
- Information Architecture
- Wireframing
- Prototyping
- Usability Testing

Development
- HTML
- CSS
- JavaScript
- Responsive Design
- Git
- Figma

Tools
- Figma
- Miro
- Notion
- Jira
- Trello
- Slack
- Google Workspace

Methods
- Agile & Scrum
- Cross-Functional Collaboration
- Stakeholder Management
- Mentoring & Coaching

Education & Certifications

2025 — **Master's Degree in UX/UI Design**
Accademia Italiana

2024 — **Bachelor's Degree in Psychology**
Università degli Studi di Genova

2023 — **Coursera**
Google UX Design Professional Certificate, Issued by Coursera

2022 — **Academy of Interactive Entertainment (AIE)**
Game Design Diploma

2021 — **Università degli Studi di Genova**
Computer Science Degree

Profile & Overview

A personalized view that gives users the data, the alerts, the planning they need to understand their energy consumption and make smarter decisions about their home.

Dashboard

Real-time and historical energy data visualized through clear, interactive charts. Users can switch between daily, weekly, and monthly views to spot trends and anomalies at a glance.

Bill

A personalized experience that breaks down costs into clear, comprehensible categories, helping users understand exactly where their money goes each month.

Challenges

Gamified challenges that encourage users to reduce consumption, track progress, and compete with friends, turning energy saving into a rewarding habit.
